CIO-EXP-BRIDGE16
16-Channel Analog Resistive Bridge
Sensor Conditioning Board

$899

- 16 Differential Inputs
- Ideal Strain Gage Interface
- User Selectable Gains, x1, x10, x100 x1000

The CIO-EXP-BRIDGE16 is an analog input multiplexer and signal conditioner designed for bridge type sensors, such as strain gages. Adding one CIO-EXP-BRIDGE expands the analog input channel of any A/D board by 16 channels of bridge type sensors. The 16 bridge inputs are multiplexed into one of the CIO-DAS800/8 or CIO-DAS1600/1400/16 board's analog input channels.

The CIO-EXP-BRIDGE16 has circuitry for completing a Wheatstone Bridge. The Wheatstone Bridge is a circuit composed of four resistors and excitation voltage. The circuit is a pair of resistor/dividers working together. The bridge is very sensitive to the values of the resistors, and especially how closely the resistors are matched, or balanced; which they must be for the circuit to work. PLEASE! Order precision balancing resistors.

A Wheatstone Bridge needs no reference to ground and does have a common mode, which means that this circuit can reject noise which a single resistor/divider pair cannot. That is very desirable when you want accurate measurements with sensitive sensors, like strain gages.

Power for the circuits is supplied from the PC or externally through the power connector and regulated by a precision circuit on the CIO-EXP-BRIDGE16. The circuit is robust enough to power sixteen bridges.

The CIO-EXP-BRIDGE16 includes a user's manual.

Ordering Example: CIO-EXP-BRIDGE16, signal conditioner multiplexer board, 12 CIO-EXP-RES-350 bridge completion resistors (enough four four quarter bridges), and OMEGACARE™ 1 year extended warranty for CIO-EXP-BRIDGE16 (adds 1 year to standard 3 year warranty), 377FF-2 cable for connection to CIO-DAS800/8 board (board is also required), 889 + 12 (3) + 25 + 89 = $1049.
More than 100,000 Products Available!

- **Temperature**

- **Flow and Level**
  Air Velocity Indicators, Doppler Flowmeters, Level Measurement, Magnetic Flowmeters, Mass Flowmeters, Pitot Tubes, Pumps, Rotameters, Turbine and Paddle Wheel Flowmeters, Ultrasonic Flowmeters, Valves, Variable Area Flowmeters, Vortex Shedding Flowmeters

- **pH and Conductivity**
  Conductivity Instrumentation, Dissolved Oxygen Instrumentation, Environmental Instrumentation, pH Electrodes and Instruments, Water and Soil Analysis Instrumentation

- **Data Acquisition**

- **Pressure, Strain and Force**
  Displacement Transducers, Dynamic Measurement Force Sensors, Instrumentation for Pressure and Strain Measurements, Load Cells, Pressure Gauges, Pressure Reference Section, Pressure Switches, Pressure Transducers, Proximity Transducers, Regulators, Strain Gages, Torque Transducers, Valves

- **Heaters**
