Temperature and Humidity
Virtual Chart Recorder

The OMEGA® iTHX-SD transmitter lets you monitor and record Temperature, Relative Humidity and Dew Point over an Ethernet network or the Internet with no special software except a Web Browser. The iTHX-SD serves Active Web Pages to display real time readings, display charts of temperature, humidity, and dew point or log data in standard data formats for use in a spreadsheet or data acquisition program such as Excel or Visual Basic.

The virtual chart viewed on the web page is a JAVA™ Applet that records a chart over the LAN or Internet in real time. With the iTHX-SD, there is no need to invest time and money learning a proprietary software program to log or chart the data.

SD Flash Memory Card
The iTHX-SD comes complete with a removable 2 GB SD Flash Memory card that can store up to seven years of readings taken at ten second intervals.

Records on SD Flash Cards
The data is recorded on widely available SD (Secure Digital) flash cards. The format is a simple text file that is easily imported to spreadsheet sheets and other programs. It can be read on a PC or MAC with a USB card reader. You can also download the data remotely over an Ethernet network or the Internet.

Alarm Relays
The iTHX-SD features two 1.5 Amp relays. With the easy Web-based setup page, the two relays can be programmed for an combination of temperature or humidity, and high or low set points. The relays can also be programmed to remain latched and require a manual reset if a limit is exceeded.

Battery Backup
The iTHX-SD comes with a universal 100 to 240 Vac power adapter. A standard 9 Volt Alkaline battery (also included) allows the device to log data for up to 2 days without external ac power. A failure on the Ethernet network will not interrupt data recording.

Adjustable Charts
Chart scales are fully adjustable on the fly. For example, the chart can display one minute, one hour, one day, one week, one month or one year. Temperature and humidity can be charted across the full span (-40 to 124°C, and 0 to 100% RH) or within any narrow range such as (20 to 30°C). When a second sensor is added, users can select a chart that records channel 1, channel 2 or the difference of the two channels.

Award-Winning Technology
The iTHX-SD is simple to install and use, and features OMEGA’s award-winning iServer technology that requires no special software except a Web Browser.

The iTHX-SD connects to an Ethernet Network with a standard RJ45 connector and sends data in standard TCP/IP packets. It is easily configured with a simple menu using a Web Browser and can be password protected.

From within an Ethernet LAN or over the Internet, the user simply types its IP address or an easy to remember name such as “Cleanroom5” or “ServerRoom” in any Web Browser, and the iTHX-SD serves a Web Page with the current readings.
Typical Applications
The iTHX-SD is great for monitoring temperature + humidity in applications such as: clean rooms, computer rooms, HVAC systems, pharmaceutical and food processing and storage, hospitals, laboratories, semiconductor fabs, electronic assembly, warehousing, museums, manufacturing, greenhouses, farm animal shelters, and many more.

Industrial Probe iTHP-5, iTHP-2:
- 137 L or 51 L x 16 mm Dia (5 L or 2 L x 0.63" Dia)
- Housing Material: 316 SS
- Cable with DB9 Connector: 3 or 0.9 m L (10 or 3)
- Cable Operating Temperature: -40 to 125°C (-40 to 257°F)

iServer Specifications
INTERFACES
- Ethernet: (RJ45)
- Fixed or auto-negotiating 10/100BASE-T, Auto MDI/MDIX
- Supported Protocols: TCP, UDP, SNMP, SMTP, NTP, ARP, ICMP, DHCP, DNS, HTTP and Telnet
- Sensor: Digital 4-wire, DB9
- LCD Display: 16 digits, 6 mm (0.23")
- SD Flash Memory Card: 2GB card: 8 months of data storage at 1 second recording intervals or 7 years at 10 second intervals
- Relay Outputs: Two relays 1.5 A @ 30 Vdc
- Embedded Web Server: Serves Web pages containing real-time data and live updated charts within definable time intervals
- Software: OPC Server; macro for datalogging in Excel program; compatible with Windows operating systems
- Power
- Input: 9 to 12 Vdc
- Safety qualified AC power adapter:
- Nominal Output: 9 Vdc @ 0.5 A
- Input: 100 to 240 Vac, 50/60Hz (included)
- Back-up Battery: 9 Vdc, alkaline (included)

ENVIRONMENTAL
- Operating Temperature: iServer unit: 0 to 60°C (32 to 140°F)
- Battery: -18 to 55°C (0 to 131°F)
- ac Adapter: 0 to 40°C (32 to 104°F)
- Storage Temperature: -40 to 85°C (-40 to 185°F)
- Packaging
- Material: Steel metal case with wall mount bracket

Sensor Specifications
RELATIVE HUMIDITY (RH)
- Accuracy/Range*:
  - 10 to 90%: ±2%
  - 5 to 10% and 90 to 95%: ±3%
  - 0 to 5% and 95 to 100%: ±4%
- Non-linearity: ±3%
- Hysteresis: ±1%RH
- Response Time: 8 seconds, tau 63%
- Repeatability: ±0.1%
- Resolution: 0.1%, 12 bit

TEMPERATURE (T)
- Accuracy/Range*:
  - Wand Probe: ±0.5°C (±1°F) for 5 to 45°C (41 to 113°F); up to ±1°C (up to ±2°F) for ±2°C
  - Industrial Probe: (see chart in manual) ±0.5°C (±1°F) for 5 to 45°C (41 to 113°F); up to ±1.5°C (up to ±2.7°F) for -40 to 5°C and 45 to 124°C
- Non-linearity: ±2.5%
- Response Time: 5 to 30 seconds, tau 63%
- Repeatability: ±0.1°C
- Resolution: 0.1°C, 14-bit

Probe Specifications
- Wand Probe:
  - 198 L x 19 mm Dia (7.8 L x 0.75" Dia)
  - Cable with DB9 Connector: 152 mm L (6" L)
  - Cable Operating Temperature: 0 to 80°C (32 to 176°F)

Email Alarms
All OMEGA iTHX-SD models that are on a LAN that is connected to the Internet can trigger an alarm that can be sent by email to a user or a distribution list anywhere in the world, including text messages to cell phones and PDA’s.

Display and Chart Two Channels
The iTHX-SD transmitters come complete with a temperature and humidity probe for measurement of a single location. With the addition of a second probe, the iTHX-SD transmitter can measure and display temperature, humidity and dew point in a second location up to ten feet away.

The transmitter can display and chart absolute measurements in both locations, or a differential measurement between the two locations. The second probe requires no change to the basic iTHX-SD transmitter hardware, it can be added at the time of purchase or in the future. OMEGA offers a choice of industrial probes in 2 and 5" lengths, and a wand style for ambient indoor applications. A simple DB-9 “Y” connector is available for adding a second probe.

Sensor and Calibration
It is not necessary to take the iTHX-SD out of service for routine calibration. The temperature/humidity sensors are interchangeable and can be replaced for about the same cost as a typical calibration. OMEGA offers replacement sensors with optional 3-point NIST traceable calibration certificates.
### To Order
