### 11. TOXICOLOGICAL INFORMATION

- **EYE EFFECTS:** Irritant.
- **SKIN EFFECTS:** Irritant.

#### CARCINOGENICITY

- **IARC:** Silica is listed as having sufficient evidence to be a carcinogen in humans and in experimental animals, for the carcinogenicity of quartz and cristobalite. The overall IARC evaluation was that crystalline silica inhaled in the form of quartz or cristobalite from occupational sources is carcinogenic to humans (group 1).

- **NTP:** The National Toxicology Program, in it's Ninth Annual report on Carcinogens, classified "silica, crystalline (respirable)" as a known human carcinogen.

- **OSHA:** Crystalline Silica (Quartz) is not regulated by the US Occupational Safety and Health Administration as a carcinogen.

**Notes:**

Silica is listed by IARC and NTP as having sufficient evidence to be a carcinogen in humans and in experimental animals for the carcinogenicity of quartz and cristobalite. The overall IARC evaluation was that crystalline silica inhaled in the form of quartz or cristobalite from occupational sources is carcinogenic to humans (group 1).

**IRRITATION:** Eye, Skin and Inhalation Irritant.

**NEUROTOXICITY:** Not Available

**REPRODUCTIVE EFFECTS:** Not Available

**TARGET ORGANS:**

-Nephrotoxicity - Recent studies suggest that exposure to respirable crystalline silica or that the disease silicosis is associated
with the increased incidence of kidney disorders.

**TERATOGENIC EFFECTS**: Not Available  
**MUTAGENICITY**: Not Available  
**SYNERGISTIC MATERIALS**: Not Available  

**GENERAL COMMENTS:**

ADDITIONAL INFORMATION: Crystalline Silica (Quartz)  
- Silicosis - The major concern is silicosis caused by the inhalation of respirable crystalline silica dust. Silicosis can exist in several forms, chronic (or ordinary), accelerated, or acute.  
- Scleroderma - There is evidence that exposure to respirable crystalline silica or silicosis is associated with incidence of scleroderma of the lungs.  
- Tuberculosis - Individuals with silicosis are at risk to develop tuberculosis, if exposed to persons with tuberculosis.

12. **ECOLOGICAL INFORMATION**

**ENVIRONMENTAL DATA:** Crystalline silica (quartz) is not known to be an environmental hazard.

**ECOTOXICOLOGICAL INFORMATION:** Crystalline silica (quartz) is not known to be ecotoxic. There is no data that suggests that crystalline silica (quartz) is toxic to birds, fish, invertebrates, microorganisms or plants.

**AQUATIC TOXICITY (ACUTE):** Sodium Silicate has low toxicity. TLM 96 hr in mosquitofish is 2,320 mg/L. High pH (alkalinity) of undiluted material is harmful to aquatic life.  
96-HOUR LC50: ≤ 5000

13. **DISPOSAL CONSIDERATIONS**

**DISPOSAL METHOD:** Comply with federal, state and local regulations. If approved, flush with water to chemical sewer. For large quantities, neutralize with dilute acid and landfill solids or flush neutral liquid to sewer with plenty of water.

**REGULATIONS**

**STATE REGULATIONS:**

Massachusetts Toxic Use Reduction Act- Silica, Crystalline (respirable size, <10microns) is toxic for purposes of the Massachusetts Toxic Use Reduction Act

Pennsylvania Worker and Community Right to Know Act- Quartz is a hazardous substance under the act, but it is not a special hazardous substance or an environmental hazardous substance.

California Inhalation Reference Exposure Level (REL)- California established a chronic REL of 3 ug for silica crystalline, respirable). A chronic REL is an airborne level of a substance at or below which no adverse health effects are anticipated in individuals indefinitely exposed to the substance at that level.

**CALIFORNIA PROPOSITION 65:** Known to the State of California to cause cancer and reproductive toxicity and subject to warning and discharge requirements under the "Safe Drinking Act of 1986".

It has not been determined and cannot be ascertained that this product would not expose users to the listed chemicals at the very low level prescribed in the regulations. Therefore, it is the user's responsibility to determine if the percent of the hazardous / carcinogenic ingredients listed elsewhere in the SDS comply with State of California regulations.
